Somehow Joe got my number and called. For now I sent him some basic ASPECT info and a photo. I am attaching a SOW and IGCE for a mission that assumes the crew will fly up, collect data, land and stay overnight for another data collect the next day before returning. It could be all you need is one set of data collected and returned to Tx all in one day. At least it's a start and I can get rolling on the PR and task issuance. Take a look and let me know what you think. Joe said he wanted to see some flight lines so I am including a preliminary set. We can talk and finalize later.

Call me when you get into Baton Rouge. Joe Ball asked for some information and planned flight lines. I want to make sure it's going thru you as much as possible.
